Summary

Systems Administrator and IT Professional with over 12 years of experience managing internal IT environments, user lifecycle provisioning, access control, and security compliance. Proven background providing remote helpdesk support, configuring cloud platforms and identity providers, and maintaining infrastructure reliability.

Skills

VMWare, Proxmox, Docker, Ansible, GitHub, AI LLM

Python, Bash, SQL, SSH, RDP, JS.Wiki, Gitea

Apache, NGINX, Tomcat, Node.JS, LAMP server configuration and troubleshooting

Cisco, Unifi equipment

MySQL, Postgres, AWS Cognito, Microsoft Azure, IDS/IPS systems

Google Workspace, Microsoft Office 365, Azure Active Directory

Experience

InMotion Hosting Remote

Systems Administrator *August 2020 - Current*

- Delivered comprehensive IT helpdesk support and resolved user connectivity, software, and account issues.
- Managed end-to-end user provisioning, deprovisioning, and access control across Google Workspace and Azure Active Directory.
- Handled over 75 weekly support requests for cPanel, WHM, and WordPress with a 95% positive feedback rating.
- Exceeded strict SLA requirements for over 60 high-priority escalations and contacts per month.
- Configured and managed Microsoft Office 365, Google Workspaces, and Microsoft Azure Active Directory environments.
- Demonstrated an advanced understanding of the TCP/IP Model and DNS settings to resolve complex networking issues.
- Troubleshoot servers for hacks and general configuration issues.
- Assist with developing AI tooling to help agents better troubleshoot and resolve issues, causing a 30% reduction in escalations to higher tiers
- Handled approximately 30 escalations daily from lower-tiered support staff, serving as an escalation point for resolving advanced issues.
- Directed Customer Success Floor operations during supervisor absences, managing agent postures to maintain service levels.
- Authored and edited over 50 KCS articles to improve clarity and streamline workflows for administrators.
- Implemented malware solutions across 150+ cPanel servers over six months to reduce security incidents by 40%, utilizing WHM integration and real-time monitoring to ensure continuous threat prevention and compliance.
- Analyzed server logs daily using WHM and cPanel log parsers to identify suspicious activity, optimize resource consumption, and enhance threat detection for 150+ servers over a 6-month period, leading to a 22% reduction in time-to-resolution for security alerts.

WolfDen Networks Forest, VA

Owner *January 2008 - Current*

- Architected and managed critical computer networking infrastructure, ensuring 99.9% uptime and performance for over 50 diverse client environments.
- Engineered advanced wired and wireless network solutions using Cisco and Ubiquiti equipment, focusing on scalability and security for high-traffic enterprise networks.
- Optimized MySQL, Postgres, and NoSQL databases within Linux (CentOS) environments, improving data retrieval speeds by 25% to support robust data management.
- Spearheaded the integration of scalable network security solutions, reducing security vulnerabilities by 40% and strengthening infrastructure reliability.
- Provide on-call technical services and system monitoring for mid- to large-scale business operations under strict deadlines.

Sam R. LaMartina

sam@srlamartina.com (970)666-0655

DevMats LLC Remote

DevOps Engineer *March 2024 - March 2026*

- Containerized 20 microservices using Docker, achieving a 60% faster deployment process.
- Engineered Cloud API solutions and automated DevOps workflows using Python, Bash, and Ansible to enhance system scalability.
- Developed and managed 1 AI-generated content system using Jupyter Notebooks, improving content delivery efficiency by 30%.
- Provisioned and maintained approximately 60 cloud servers across Linode, Vultr, and Digital Ocean using Proxmox and Portainer.
- Managed over 50 repositories and 200 documentation pages, implementing robust documentation and version control standards using JS.Wiki and Gitea for internal repositories.

Amazon.com Seattle, WA

Various Positions *August 2018 - June 2020*

- Facilitated enrollment in the Amazon Technical Academy to include Fulfillment Center Associates (Tiers 1-3) and Customer Service Call Center employees.
- Formulated a response to the issues posed by COVID-19 by moving meetings to an online format to enable continued learning and engagement.
- Created and managed laptop loaner program for Fulfillment Center and Contact Center associates (Tiers 1-3).
- Orchestrated a volunteer program for Software Development Engineers to mentor participants, facilitating knowledge transfer and technical growth.
- Advocated for Fulfillment Center associates to gain access to Amazon Chime for collaboration off the Amazon network.
- Engineered a reporting system to track late departures and automate truck check-in/out processes, enhancing operational efficiency.
- Created an internal Wiki page to help new hires easily learn the job and to provide a one-stop-shop for all links and standard operating procedures.
- Reduced cost overruns by 20% in the first year by tracking labor hours vs product volume.
- Established bi-weekly study groups to enhance memory retention, foster collaboration, and build a sense of community.

Involvement

United States Coast Guard Auxiliary Washington, DC

Branch Chief – Cybersecurity Engineering (National Staff) *February 2020 – December 2022*

- Deployed a multi-factor authentication system with AWS Cognito and Microsoft Azure for approximately 30,000 users.
- Deployed, configured, and managed routers, switches, IDS/IPS systems, proxies, and various other assets to ensure enterprise and government-level security protocols are followed.
- Mentored and managed Branch Assistants to improve their performance and enhance their tasks within the Auxiliary, and promote upward progression in the leadership chain for new ideas and thought processes.
- Provided security recommendations to developers in other National Staff divisions
- Disseminated cybersecurity practices down to local units and ensuring best practices are being followed.

United States Coast Guard Auxiliary Lynchburg, VA

Flotilla Commander, Flotilla Staff Officer - Communications, Public Affairs, Training *February 2008 – December 2022*

- Managed Flotilla as the Flotilla Commander, reporting to the Division Commander.
- Ensured compliance with Chain of Command and Coast Guard and Auxiliary Policies.
- Compiled Flotilla Staff Officer Reports.
- Help guide Staff Officers how to prioritize projects based on time and impact to the flotilla.
- Ensured all web content and technological equipment is up-to-date and adheres to all Coast Guard Standards, including mass communication methods like Email.
- Created a complete virtual communication platform for member engagement including a fully remote minutes-taking program for paperless meeting minutes with instantaneous delivery.
