Summary of Qualifications

DevOps Engineer and Systems Administrator with over 12 years of progressive responsibility in a high-volume environment resolving complex issues. Experienced in server virtualization, high availability nodes, Python coding, Bash scripting, and database administration. Familiar with VMware, Proxmox, Docker, Ansible, and GitHub, with a focus on configuring and managing Linux servers for multipurpose environments.

Work Experience

Systems Administrator — InMotion Hosting

Remote | August 2020 – Current

- System Administrator in a fast-paced web hosting environment.
- Knowledgeable in Apache, NGINX, Tomcat, Node.js, and LAMP server configuration and troubleshooting.
- Work within deadlines to fulfill SLAs on contracts.
- Assist with Microsoft 365, Google Workspace, and Microsoft Azure Active Directory configuration and management.
- Daily use and familiarity with the Linux command line; advanced understanding of the TCP/IP model and DNS settings.
- Troubleshoot servers for hacks and general configuration issues.
- Mentor other departments as an escalation point for resolving advanced issues.
- Monitor and edit KCS articles for clarity to make the job easier for new and experienced administrators.

Owner — WolfDen Networks

Forest, VA | January 2008 – Current

- Manage the operation of company-provided computer networking infrastructure.
- Assess, repair, upgrade, and monitor various system protocols.
- Provide on-call services to mid- to large-scale businesses.
- Set up Active Directory and email accounts for clients.
- Design and configure advanced wired and wireless networks using Cisco and Unifi equipment.
- Create and maintain light MySQL and Postgres databases in a Linux environment using CentOS servers.

DevOps Engineer — DevMats LLC

Remote | March 2024 – Current

- Cloud API development and DevOps using Python, SSH, RDP, Bash, Linode, and Git.
- Helped set up and manage AI-generated and procedurally generated content using Jupyter Notebooks.
- Managed full-stack Linux servers to deploy microservices using SQL, Python, Bash, and Ansible.
- Created and deployed Docker images; used Yacht and Portainer for container management.
- Provisioned cloud servers using Linode, Vultr, and DigitalOcean.
- Used JS.Wiki for documentation and Gitea for internal repositories.
- Configured High Availability containers using Proxmox.

Various Positions — Amazon.com

Seattle, WA | August 2018 – June 2020

- Facilitated enrollment in the Amazon Technical Academy for Fulfillment Center and Customer Service associates.
- Moved meetings to a Chime/Zoom-based format in response to COVID-19 to enable continued learning.
- Created and managed a laptop loaner program for Fulfillment Center and Contact Center associates.
- Launched a volunteer program for Software Development Engineers to teach topics to study group participants.
- Developed reporting to automate the check-in/check-out process for trucks and track late departures.
- Created an internal wiki for new hires and reduced cost overruns by 20% in the first year.

Volunteer & Other Experience

Flotilla Commander / Staff Officer — U.S. Coast Guard Auxiliary

Lynchburg, VA | February 2008 – December 2022

- Managed the Flotilla, reporting to the Division Commander, ensuring compliance with Coast Guard and Auxiliary policies.
- Guided Staff Officers on prioritizing projects by time and impact to the Flotilla.
- Built a complete virtual communication platform for member engagement, including remote, paperless meeting minutes.

Branch Chief, Cybersecurity Engineering (National Staff) — U.S. Coast Guard Auxiliary

Washington, DC | February 2020 – December 2022

- Deployed a multi-factor authentication system using AWS Cognito and Microsoft Azure.
- Managed deployment and configuration of routers, switches, IDS/IPS systems, and proxies to enterprise and government-level security standards.
- Mentored and managed Branch Assistants and provided security recommendations to other National Staff divisions.
- Disseminated cybersecurity best practices to local units.

Webmaster (Volunteer) — Virginia LGBTQ+ Network

Remote | 2020 – Current

- Provide website support for a resource outlet serving LGBTQ+ residents of Virginia.

Education

University of Maryland Global Campus — Washington, DC

2019 – Current | Continuing education in Computer Engineering with a focus on Ethics and Cyber Security

cPanel University — Houston, TX

2016 – 2022 | Continuing education courses in cPanel and Web Host Manager (WHM)

Community College (Remote)

2008 – 2020 | Information Systems Analyst, focus on Computer Engineering and Cybersecurity

Skills
